SearchTheGit

Ultimate tool to efficiently explore Git repositories,
finding projects based on their utilized
technologies!

Objective

To find the open source projects which built with the specific technologies.

Help users to understand implementation and best code practices for that particular technology.

Technology to be used

Next js

MongoDB

ElasticSearch

Github API

Caching & Crone Jobs

Incremental Site Regeneration

PenCraft

The ultimate **crafting** platform where the pen
becomes an artistic tool.

Experience calligraphy, hand lettering, and more.
Unleash creativity, connect with others, and make
personalized moments that last.

Potraits

Hand
Embroidery

Calligraphy

Some Common Art Forms

Mandalas

Quilling

Origami

Problem

Lack of a **centralized platform** for hand and pen-based craft skills, leading to limited opportunities for enthusiasts to showcase their creativity and difficulties in finding unique and personalized solutions for greeting cards and assignments.

Objective

To create an **innovative** online platform for hand and pen-based craft skills, fostering creativity, personal connections, and becoming the top choice for personalized greeting cards, assignments, and artistic expressions.

Technology to be used

Next.js

React Native

Stripe

Next Admin

Empowering Next.js developers with a seamless
admin panel creation with a CLI.

Objective

A CLI which parse the mongoose models and creates an admin panel which can perform CRUD operation.

To Save 60% developers effort and time with customizable admin panel.

Technology to be used

NPM

Mongoose

Node.js

Next.js
